

## **ACADEMIA CENSUS**

1. Enable Admin to the login page where they have to provide their credentials as their username and password. If they forgot the password, by using their mail id entered, they can receive the generated OTP to their respective mail ids. Respective Admins can make the entry of Faculty details as well as Student details and they can edit the respective entries as well if needed.
2. Enable student or faculty to the main page of login where the same login credentials are collected as admin but the role of the students is to view their respective mark details as well. Faculty members can also view the details of the students and if needed respective tutors can edit their student details.
3. If they don't have login credentials, they can sign up by entering the details such as their Name, Employee id, Email id, password with some constraints and phone number with some security questions in the drop down menu.
4. With their login credentials, they will be redirected to the main page of menu bar where new student entry, new faculty entry, student and faculty database viewing and also Examination entry and examination viewing selects are available.
5. When they give new Student Entry, all their important credentials are asked to fill so that it may helpful in viewing the databases. (The details may include their name, roll no., address, their respective mail ids, marks and their respective tutor details etc.
6. When they give new Faculty entry, same as Student entry all the credentials are provided such as their Name, Employee id, their respective mail ids and other personal details.

7. After all these entries, we can view their databases and by giving Student viewing we can view all the details of the student. If we need to update the details thereby we can opt for update so that it is directed to update page and also we can convert their details to pdf as well.
8. As Student viewing, we can give Faculty viewing and view the details and update as same did in student viewing. We can Search the faculty details by giving their Employee id.
9. Examination mark entry is also done in the same manner where the details are collected and GPA and total of the particular student are calculated.
10. After these entries, we can check the examination marks by giving their roll no., Date of Birth in the calendar and by clicking the result, we can view the result page.
11. Result viewing page contains subjects and their respective marks and it can be converted into pdf to take print and we can come back to the menu page or we can close the page.
